

## **New scientific studies show OHc kills the harmful bacteria Pseudomonas Aeruginosa.**

Most over-the-counter disinfectants are harmful to your lungs when you breathe in their fumes. Even the instructions advise you to only use in well ventilated areas. They may disinfect, but at the same time, it is harmful to you. OHc is derived from natural plants with no added alcohols or toxic chemicals. The essential oils do the work for you without harmful side effects.

Pure therapeutic grade essential oils are the main active ingredients and working force in OHc. It cleans your home naturally. OHc is all about the essential oils. We do not dilute or combine our oils with any other ingredients besides organic vinegar and purified water. By doing this we maximize the effects of the pure therapeutic grade essential oils. This creates a slightly more costly product, but one that it is completely natural.

Not only does OHc clean, shine, and degrease surfaces, but scientific tests have proven it kills the resistant and harmful bacteria *Pseudomonas aeruginosa*. Who are the most susceptible people to encounter *Pseudomonas aeruginosa*? People with low immunities such as the elderly; cancer patients going through chemotherapy; individuals with cystic fibrosis; and individuals prone to urinary tract infections and/or respiratory infections. With OHc you can confidently clean your home, hospital room, car interior, office and especially spa hot tubs with this completely natural cleaner.

When it comes to cleaning power, OHc works fast. OHc kills *Pseudomonas aeruginosa* according to FDA standards. Testing confirms that other harmful bacteria, such as *Klebsiella pneumoniae* and *Escherichia coli* (e-coli), were significantly reduced and it appears that both of these bacteria would have been killed in approximately 7 minutes. Although it may take a few minutes longer for essential oils to kill these bacteria, the effect lasts longer than bleach. Plus, you are not harming the earth or yourself!

### **Convenience:**

We do not add ingredients such as emulsifiers or added alcohols. Because we are the first cleaner on the market to allow the essential oils to be the actual cleaning and mild disinfecting agent, you must simply “shake” the product well before each use. As a result, the aroma remains in its true form and is absolutely enjoyable.

### **Aroma:**

Lavender is well exploited for its aroma, yet the synthetic fragrance is mimicked so well that our senses are beginning to recognize “fake” for what should be real and natural. There are no benefits to these fake smells. It is only through the pure therapeutic grade essential oils we can allow the aroma to truly work for us.

### **Benefits of Pure Therapeutic Grade Essential Oils:**

The plants from which these oils come have been raised with no pesticides; therefore there is no chemical residue. You can safely enjoy the benefits of eucalyptus for sinus or respiratory relief as well as its invigorating properties. Lavender is calming and rounds off the effects of eucalyptus. Lemon is the “happy” essential oil and grapefruit is good for concentration. Together they create an all-around household cleaner that is not only good for you and the earth, smells great, but also cleans like “nobody’s business!”
